

Welcome to the new TransLux.

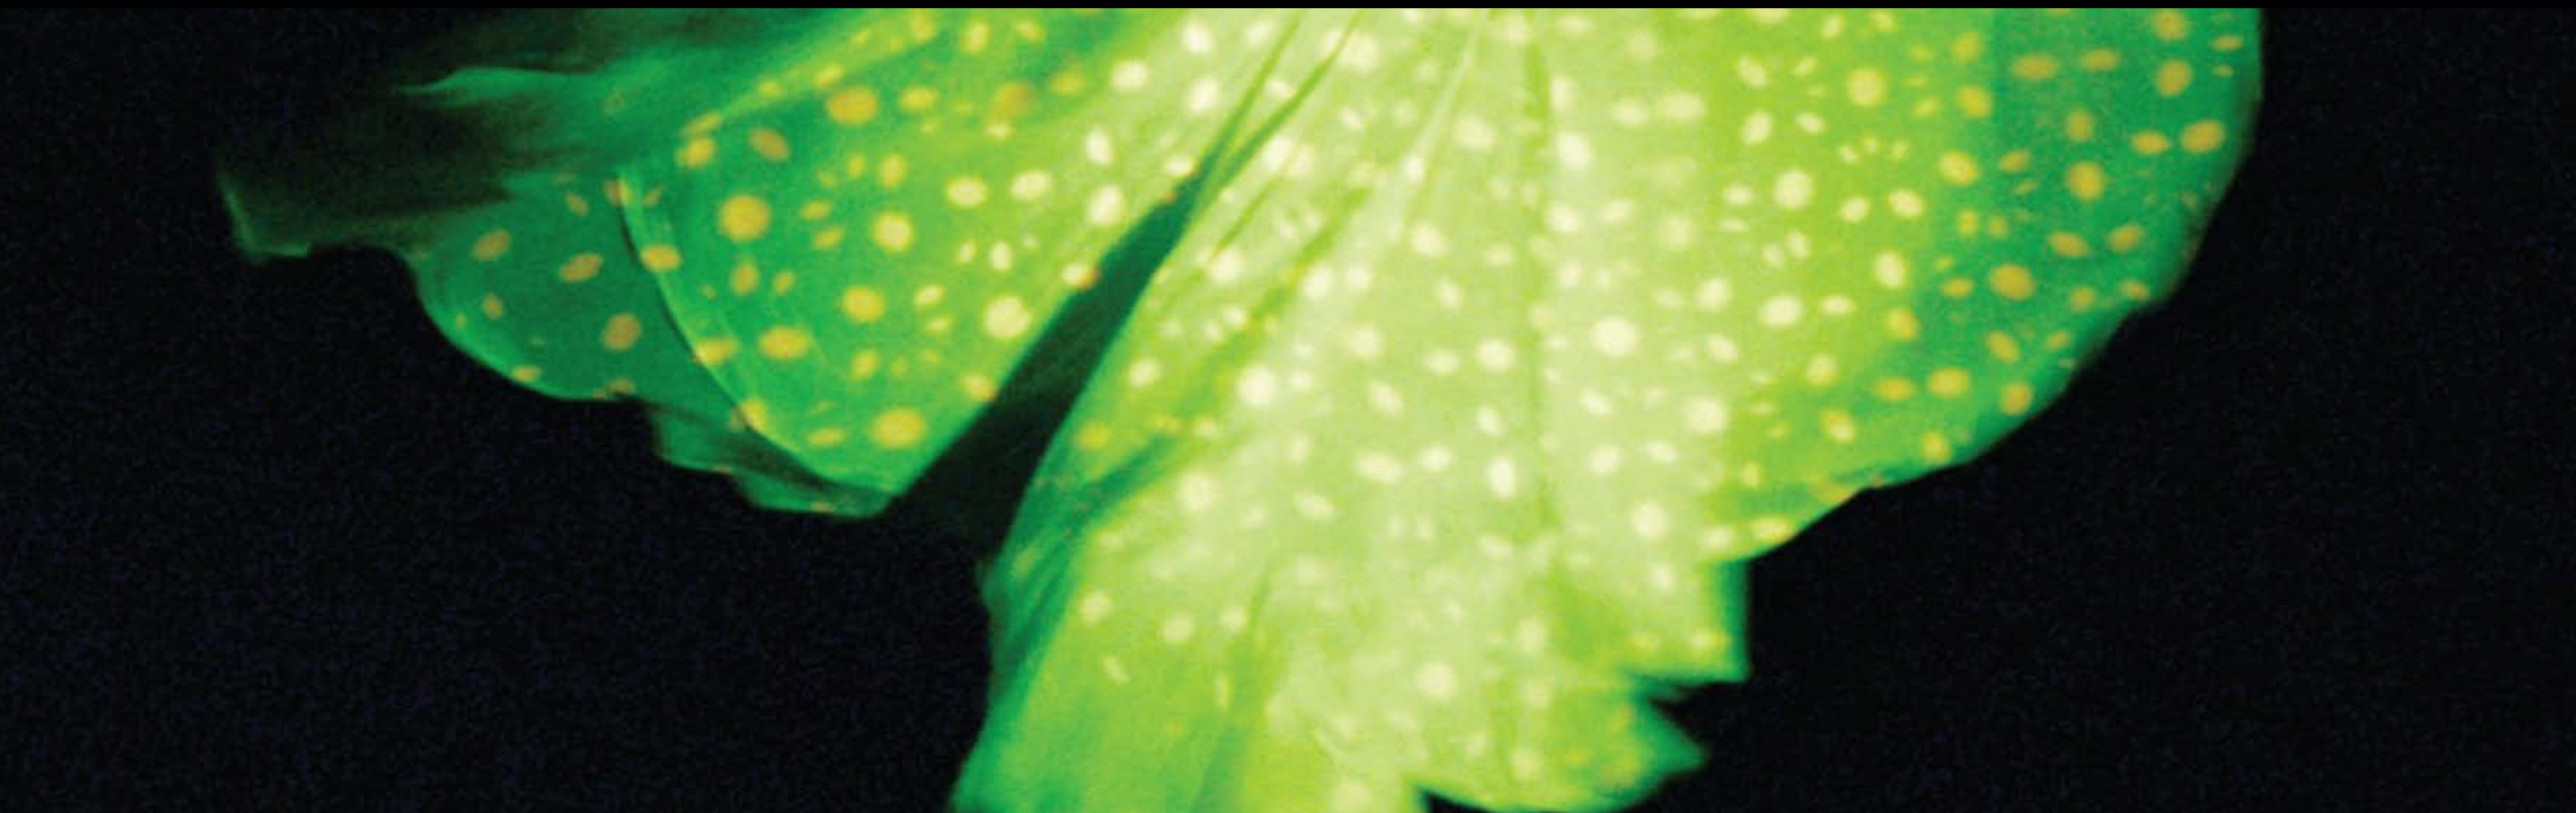

As a world leader in content delivery, we understand digital displays are all about engagement.

How your digital display solutions engage your customers. And how TransLux engages you.

Both completely intertwined to deliver digital display solutions that let you express your vision.

Express your content in any conceivable shape, size or form. TL Vision is the platform for your imagination.

We're accomplishing this by building on our 90 year history of display technology experience.

But this isn't about our history – it's about making history with you – achieving new milestones.

With innovative new display technologies that deliver more than just images.

We're talking digital display solutions that deliver the wow factor.

That attract, stimulate and captivate viewers across every walk of life and in any venue.

Our new catalog of display solutions says it all. Large screen LED systems including

an industry first 3mm, data displays in any size and shape, and our FairPlay scoreboards.

A glowing blue ring with several red spots is centered on a black background. The ring is slightly out of focus, creating a soft, ethereal glow. The red spots are scattered along the inner and outer edges of the ring, resembling stars or data points.

They'll transform any sports and entertainment, financial, gaming or event venue into what you want it to be...

with the ability to easily change the environment in minutes.

Imagine transforming your facility from formal to freestyle overnight.

And with new LED lighting solutions from TL Energy,

you can literally transform the look of your entire facility in any color scheme and intensity you like.

You control the theme, the mood, the complete environment.

Plus with the efficiency of LED lighting, your facility will be green and your energy bills lower.

All together, delivering a visual experience like no other.

Comprehensive digital display solutions that will engage you.

Welcome to the new TransLux.
