

# LED T&T

## New 3x3 Configuration for LED T&Ts

**S**uper bright LED Time and Temperature displays are now available in a new configuration for optimal fill and readability. The displays' slim profile makes them ideal for retrofit situations as well as new installations.

- Available in 30", 24" and 18" character heights.
- Temperature can be shown as degrees, Celsius, or Fahrenheit with customizable temperature offsets.
- Red and amber Time and Temperature displays have 16 dimming levels for all lighting conditions.
- Global Positioning Satellite (GPS) option available which allows the display to track satellite time for perfect accuracy.
- The backup battery will automatically maintain the correct time and hold pre-programmed settings until the power is restored. Three-year battery backup included.
- Easy to program and use with on-board buttons and display.
- Automatically adjusts for daylight savings time (this feature can be disabled).
